# Introduction

Founded in 2002, Austin City Limits (ACL) Music Festival presented by the Austin Parks Foundation is one of the premier destination festivals in the United States. ACL Music Festival is an 9-stage music, food and art festival that takes place on back-to-back weekends in Zilker Park, located in the heart of Austin, Texas.

In 2009, the festival promoter, C3 Presents, hired AngelouEconomics (AE) to measure the economic contributions of the ACL Music Festival to Austin. Given the longevity of the C3 Presents and AE relationship, AE can measure the cumulative impact of ACL Music Festival on the Austin economy. The following report captures the full effect of the 2023 ACL Music Festival on Austin's local economy.

The analysis includes two separate impacts:

The impact of festival operations

The impact of festival attendee expenditures

These calculations are based on data provided by C3 Presents and an extensive attendee spending survey completed by over 8,800 festival attendees.

# Executive Summary

The annual ACL Music Festival continues to contribute significantly to Austin's economy. The 2023 ACL Music Festival contributed **\$499.9 million** to the Austin economy, which is the equivalent of **3,766 full time jobs**. Since we began tracking economic impact in 2006, ACL Music Festival has generated over **\$3.5 billion** for the Austin economy – the equivalent of retaining **35,967 jobs** for Austin employees.

Over the last 19 years, ACL Music Festival's partnership with the Austin Parks Foundation has provided more than **\$63 million** to Austin's public park system. This unique relationship ensures that a portion of every ticket purchased supports parks in every corner of Austin. The 2023 ACL Music Festival alone generated **\$8.1 million** toward park improvements across the city. This **\$8.1 million** is in addition to City expenses, maintenance, and restoration of Zilker Park, which are also paid annually by ACL Music Festival.

# Economic Impact Methodology

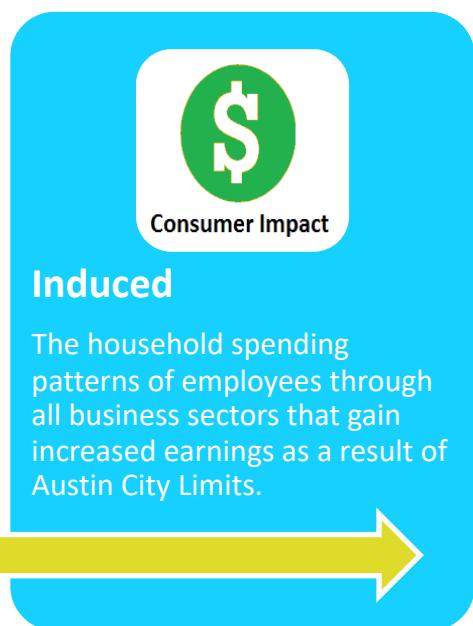

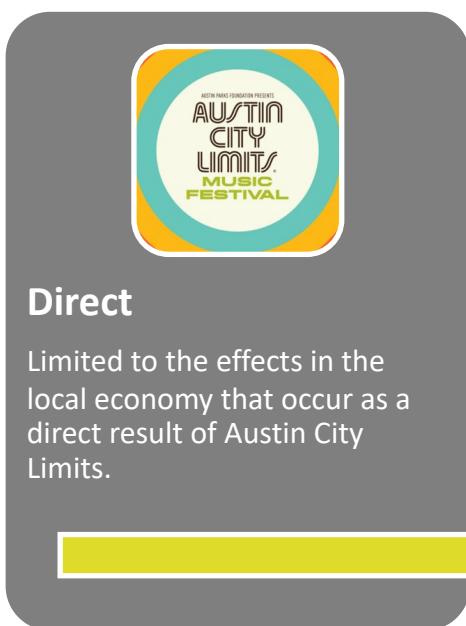

## Economic Impact Models & Inputs

- AngelouEconomics employed the IMPLAN (IMpact Analysis for PLANning) model for the analysis of the 2023 ACL Music Festival. The model utilizes multipliers specific to the Austin economy, specifically Travis County. The analysis of ACL Music Festival is comprised of two models: festival operations and attendee expenditures. The sum of these two impacts create the total economic output of the music festival.
- Festival operations data was provided by C3 Presents and were used to generate the festival operations model. The attendee expenditures model was created using inputs from survey data and assumptions estimating the amount of money spent by attendants on various categories of expenditures.

## Model Outputs

- Each of the models generate three different types of effects: direct, indirect and induced effects. The IMPLAN model's calculated outputs include jobs, labor income, total economic output, and state and local tax revenues.

# Economic Impact

## Total Impact of Austin City Limits Music Festival

### TOTAL ECONOMIC IMPACTS

	Full-Time Job Equivalents	Labor Income	Total Economic Activity
Direct	2,786	\$111,495,970	\$292,881,916
Indirect	532	\$39,971,325	\$116,866,264
Induced	447	\$30,557,905	\$90,228,311
<b>TOTAL*</b>	<b>3,766</b>	<b>\$182,025,199</b>	<b>\$499,976,491</b>

\*Totals may not sum due to rounding
